Food From The Heart Project

Sec 1 : Project Self

Sec 2 : Project Life

Sec 3 : Project Sphere

Sec 4 : Project Friendship

Students' Reflection

Patrick Lim

Secondary Four Normal Academic

I am in the Normal Academic Stream. My teacher showed a lot of faith when she chose me to pursue Additional Maths and O Level E Maths. I was not so confident initially. My teachers never let me give up and I worked very closely with them so that I was prepared to perform to the best of my ability. I have gained a lot of confidence and am aiming for distinctions in both N Level and O Level Maths. It is important to never undermine our own potential and cooperate with the teachers who only want the best for us.

Celeste Tan

Secondary Four Express

The Student Council has provided me with a platform to learn, serve and lead. We are involved in various operational duties every morning and that unites us as a responsible student council. As the secretary, I have become better and overcome my fears and I have challenged myself to share my opinions clearly with my team. I am thankful for these opportunities and the confidence that I have gained over the years.

Karisha D/o Murugan

Secondary Two Normal Academic

Lessons in East View are enjoyable and engaging. I enjoy my Maths lessons the most. My teacher involves us in several activities which include the use of rubrics cube and few other engaging activities. These help in clarifying our concepts and enhancing our understanding of the topics. I really look forward to my Maths lessons.

Reagen Chia
Secondary Four Express

Teachers in East View are very patient and approachable. They understand us, our abilities and do everything in their means to stretch us. At the same time, they help us manage ourselves better. I am able to cope with 8 subjects due to their continuous monitoring and concern for my overall well-being. They make learning a pleasant experience for us.

Muhamed Daniel
Secondary Three Normal Technical

The school organises several engaging activities for us. There are many learning journeys for us which help us improve our writing skills. One such interesting learning journey was to a food court. We were taught how to do a food review. Many lessons were conducted to introduce appropriate vocabulary and style of reviewing food. We were then taken to a food court to review authentic local cuisine. What better way is there to practise writing? I felt like a food critic. I truly appreciate the effort put in by my teacher to arrange such learning experiences for us.

Sharifa Iman Syuhada
Secondary Three Express

I find my History teachers interesting and inspiring. Over the last two years, History has become my favourite subject. Learning about the past is interesting but I have also realised that we owe a lot to our past. I can't wait for my history lessons because we reflect on historical events not just as events of the past but as events that have an impact on the future as well. There is always a valuable lesson that I learn from these historical events. I enjoy it when history comes alive in the form of 3D sources and relics from the past that we can touch, feel and experience.

CCA in EVSS

Character Development Through Teamwork

Sports - Basketball, Floorball (Girls and Boys), Football, Judo, Netball, Sepak Takraw

Performing Arts - Chinese Orchestra, Malay Dance, Military Band, Modern Dance

Uniformed Groups - NCC, NCDCC, NPCC, SJAB
